

DASH CAM POLICY

It has come to our attention that there have been instances where drivers are attempting to conceal or tamper with the in-cab dashcams installed in our vehicles. We want to remind everyone that this action is a serious violation of company policy and will not be tolerated.

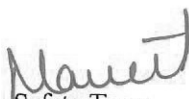

Effective immediately, any attempt to hide or tamper with in-cab dashcams will be considered a serious offense against company policy. In addition to disciplinary action, there will be a chargeback of \$50 each time a driver is found to have hidden or tampered with the dashcam.

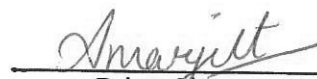

Our in-cab dashcams are essential tools for ensuring the safety and security of both our drivers and the general public. They help monitor driving behavior, provide evidence in the event of accidents or disputes, and promote accountability on the road.

We understand that there may be concerns about privacy, but please be assured that the dashcams are only activated during driving hours and are solely used for safety and security purposes.

We urge all drivers to adhere to company policies and to cooperate fully with the use of in-cab dashcams. Your compliance is not only mandatory but essential for maintaining the safety standards we uphold as a company.

Thank you for your attention to this matter.

Safety Team
Thank you
